

Declaration that Stopseal® Ablative Spray Coating complies with the FEICA Model Environmental Product Declaration Dispersion-based products.

15th September 2020

Dear customer,

FSi Limited is a member of BASA, which in turn is a member of FEICA, the Association of the European Adhesive and Sealant Industry. FEICA has developed European Model EPDs for dispersion-based products. These Model EPDs were verified by the independent institute IBU (Institut Bauen und Umwelt); Germany's Institute for Building and the Environment.

The FEICA Model EPDs have been published on the FEICA website¹, and also on the websites of the IBU² and ECO³ (Platform of the European EPD Programme Operators⁴) and can be downloaded there.

As a member of BASA, and with the help of internal FEICA guidance, FSi Limited is entitled to determine the compatibility of its product with the FEICA Model EPD.

By means of this declaration, we certify that we have verified the compatibility of Stopseal® Ablative Spray Coating with the FEICA Model EPD for dispersion-based products according to the FEICA guidance developed for this purpose. This means that the LCA data and the other content of the attached Model EPD apply to the above-mentioned product and can be used for the assessment of buildings.

Please do not hesitate to contact us if you require any further information.

Yours sincerely,

Aaron Turrall

Quality Administrator
